Facebook Nation Newton Lee, 2012-09-15 President Barack Obama, in his 2011 State of the Union Address, called America the nation of Edison and the Wright brothers and of Google and Facebook. U.S. Chief Information Officer, Steven VanRoekel, said that America has become a Facebook nation that demands increased transparency and interactivity from the federal government. Facebook as a nation in 2012 would be the third largest country in the world with over 900 million citizens, after China and India. This book portrays the social media ecosystem as a world of increasing Total Information Awareness, which is essentially a civilian version of the controversial Total Information Awareness program unveiled in 2002 by the Defense Advanced Research Projects Agency (DARPA) at the U.S. Department of Defense. Back in the 60's, DARPA initiated and funded the research and development of Advanced Research Projects Agency Network (ARPANET) that went online in 1969. The success of ARPANET gave rise to the global commercial Internet in the 90's and the new generation of Fortune 500 companies today including Amazon.com, Google, eBay, and Yahoo!. As if life comes full circle in the 21st century, private businesses and the ubiquity of social networks such as Facebook, Google+, Twitter, and YouTube are creating the technologies and infrastructures necessary for the DARPA-proposed Total Information Awareness program. WikiLeaks founder Julian Assange called Facebook the most appalling spying machine that has ever been invented. Indeed, military and civilian technologies have interwoven into every fabric of our society, as Facebook co-founder and CEO Mark Zuckerberg said, We exist at the intersection of technology and social issues. This book offers discourse and practical advice on the privacy issue in the age of big data, the rise of Facebook nation, and Total Information Awareness. Opening with President Ronald Reagan's 1984 National Security Decision Directive and ending with George Orwell's novel 1984, the author takes us on a roller-coaster ride through Facebook's botched IPO, Carrier IQ, Kony 2012, SOPA/PIPA blackout, cyber bullying, crime fighting, and a host of other timely issues facing our Facebook nation. Social media strategists, information architects, social scientists, policymakers, and academic scholars in the Program in Science, Technology, and Society (STS) will find this book a valuable asset.

Spinglish Henry Beard, Christopher Cerf, 2015-06-02 Spinglish—the devious dialect of English used by professional spin doctors—is all around us. And the fact is, until you’ve mastered it, politicians and corporations (not to mention your colleagues and friends) will continue putting things over on you, and generally getting the better of you, every minute of

every day—without your even knowing it. However, once you perfect the art of terminological inexactitude, you'll be the one manipulating and one-upping everyone else! And here's the beauty part: Henry Beard and Christopher Cerf, authors of the New York Times semi-bestseller *The Official Politically Correct Dictionary and Handbook*, have compiled this handy yet astonishingly comprehensive lexicon and translation guide—a fictionary, if you will—to help you do just that. If you want to succeed in business (or politics, sports, the arts, or life in general) without really lying, this is the book for you! (Your results may vary.) Spinglish includes these nifty bits of spurious verbiage and over a thousand more: aesthetic procedure – face-lift dairy nutrients – cow manure enhanced interrogation techniques – torture “For your convenience.” – “For our convenience.” hands-on mentoring – sexual relations with a junior employee incomplete success – failure rightsizing – firing people zero-tasking – doing nothing With each and every entry sourced from some of the greatest real-life language benders in the world today, you're virtually guaranteed to have the perfectly chosen tried-and-untrue term right at the tip of your forked tongue. Wish you could nimbly sidestep a question without batting an eye? Not sure how to apologize while also . . . not apologizing? Spinglish has you covered. Simply consult this convenient, shoot-from-the-lip glossary, and before you know it, you'll be telling it like it isn't, it wasn't, and it couldn't ever have been.

What if everything you knew about education was wrong? David Didau, 2015-06-10 If you feel a bit cross at the presumption of some oik daring to suggest everything you know about education might be wrong, please take it with a pinch of salt. What if everything you knew about education was wrong? is just a title. Of course, you probably think a great many things that aren't wrong. The aim of the book is to help you 'murder your darlings'. David Didau will question your most deeply held assumptions about teaching and learning, expose them to the fiery eye of reason and see if they can still walk in a straight line after the experience. It seems reasonable to suggest that only if a theory or approach can withstand the fiercest scrutiny should it be encouraged in classrooms. David makes no apologies for this; why wouldn't you be sceptical of what you're told and what you think you know? As educated professionals, we ought to strive to assemble a more accurate, informed or at least considered understanding of the world around us. Here, David shares with you some tools to help you question your assumptions and assist you in picking through what you believe. He will stew findings from the shiny white laboratories of cognitive psychology, stir in a generous dash of classroom research and serve up a side order of experience and observation. Whether you spit it out or lap it up matters not. If you come out the other end having vigorously and violently disagreed with him, you'll at least have had to think hard about what you believe. The book draws on research from the field of cognitive science to expertly analyse some of the unexamined meta-beliefs in education. In Part 1; 'Why we're wrong', David dismantles what we think we know; examining cognitive traps and biases, assumptions, gut feelings and the problem of evidence. Part 2 delves deeper - 'Through the threshold' - looking at progress, liminality and threshold concepts, the science of learning, and the difference between novices and experts. In Part 3, David asks us the question 'What could we

do differently?' and offers some considered insights into spacing and interleaving, the testing effect, the generation effect, reducing feedback and why difficult is desirable. While Part 4 challenges us to consider 'What else might we be getting wrong?'; cogitating formative assessment, lesson observation, grit and growth, differentiation, praise, motivation and creativity.

Confessions of a Recovering Environmentalist and Other Essays Paul Kingsnorth, 2017-08-01 A provocative and urgent essay collection that asks how we can live with hope in “an age of ecocide” Paul Kingsnorth was once an activist—an ardent environmentalist. He fought against rampant development and the depredations of a corporate world that seemed hell-bent on ignoring a looming climate crisis in its relentless pursuit of profit. But as the environmental movement began to focus on “sustainability” rather than the defense of wild places for their own sake and as global conditions worsened, he grew disenchanted with the movement that he once embraced. He gave up what he saw as the false hope that residents of the First World would ever make the kind of sacrifices that might avert the severe consequences of climate change. Full of grief and fury as well as passionate, lyrical evocations of nature and the wild, *Confessions of a Recovering Environmentalist* gathers the wave-making essays that have charted the change in Kingsnorth’s thinking. In them he articulates a new vision that he calls “dark ecology,” which stands firmly in opposition to the belief that technology can save us, and he argues for a renewed balance between the human and nonhuman worlds. This iconoclastic, fearless, and ultimately hopeful book, which includes the much-discussed “Uncivilization” manifesto, asks hard questions about how we’ve lived and how we should live.

Unapologetic John W. Loftus, 2016-11-01 Just as intelligent design is not a legitimate branch of biology in public educational institutions, nor should the philosophy of religion be a legitimate branch of philosophy. So argues acclaimed author John W. Loftus in this forceful takedown of the very discipline in which he was trained. In his call for ending the philosophy of religion, he argues that, as it is presently being practiced, the main reason the discipline exists is to serve the faith claims of Christianity. Most of philosophy of religion has become little more than an effort to defend and rationalize preexisting Christian beliefs. If subjects such as biology, chemistry, physics, and geology are all taught without reference to faith-based supernatural forces as explanations, faith-based teachings should not be acceptable in this discipline either. While the book offers a fascinating study of the fallacies and flaws on which one whole field of study rests, it speaks to something much larger in the ongoing culture wars. By highlighting the stark differences between faith-based reasoning and evidence-based reasoning, Loftus presents vital arguments and lessons about the importance of critical thinking not only in all aspects of study but also in life. His conclusions and recommendations thus resonate far beyond the ivory towers and ivy-covered walls of academic institutions.

How to Be Less Stupid About Race Crystal Marie Fleming, 2018-09-18 A unique and irreverent take on everything that's wrong with our “national conversation about race”—and what to do about it *How to Be Less Stupid About Race* is your

essential guide to breaking through the half-truths and ridiculous misconceptions that have thoroughly corrupted the way race is represented in the classroom, pop culture, media, and politics. Centuries after our nation was founded on genocide, settler colonialism, and slavery, many Americans are kinda-sorta-maybe waking up to the reality that our racial politics are (still) garbage. But in the midst of this reckoning, widespread denial and misunderstandings about race persist, even as white supremacy and racial injustice are more visible than ever before. Combining no-holds-barred social critique, humorous personal anecdotes, and analysis of the latest interdisciplinary scholarship on systemic racism, sociologist Crystal M. Fleming provides a fresh, accessible, and irreverent take on everything that's wrong with our "national conversation about race." Drawing upon critical race theory, as well as her own experiences as a queer black millennial college professor and researcher, Fleming unveils how systemic racism exposes us all to racial ignorance—and provides a road map for transforming our knowledge into concrete social change. Searing, sobering, and urgently needed, *How to Be Less Stupid About Race* is a truth bomb for your racist relative, friend, or boss, and a call to action for everyone who wants to challenge white supremacy and intersectional oppression. If you like Issa Rae, Justin Simien, Angela Davis, and Morgan Jerkins, then this deeply relevant, bold, and incisive book is for you.

Hyperbole and a Half Allie Brosh, 2013-10-29 #1 New York Times Bestseller “Funny and smart as hell” (Bill Gates), Allie Brosh’s *Hyperbole and a Half* showcases her unique voice, leaping wit, and her ability to capture complex emotions with deceptively simple illustrations. FROM THE PUBLISHER: Every time Allie Brosh posts something new on her hugely popular blog *Hyperbole and a Half* the internet rejoices. This full-color, beautifully illustrated edition features more than fifty percent new content, with ten never-before-seen essays and one wholly revised and expanded piece as well as classics from the website like, “The God of Cake,” “Dogs Don’t Understand Basic Concepts Like Moving,” and her astonishing, “Adventures in Depression,” and “Depression Part Two,” which have been hailed as some of the most insightful meditations on the disease ever written. Brosh’s debut marks the launch of a major new American humorist who will surely make even the biggest scrooge or snob laugh. We dare you not to. FROM THE AUTHOR: This is a book I wrote. Because I wrote it, I had to figure out what to put on the back cover to explain what it is. I tried to write a long, third-person summary that would imply how great the book is and also sound vaguely authoritative—like maybe someone who isn’t me wrote it—but I soon discovered that I’m not sneaky enough to pull it off convincingly. So I decided to just make a list of things that are in the book: Pictures Words Stories about things that happened to me Stories about things that happened to other people because of me Eight billion dollars* Stories about dogs The secret to eternal happiness* *These are lies. Perhaps I have underestimated my sneakiness!

Bluesman Andre Dubus III, 2001-02-13 With *House of Sand and Fog*, his National Book Award-nominated novel, Andre Dubus III demonstrated his mastery of the complexities of character and desire. In this earlier novel he captures a roiling time in American history and the coming-of-age of a boy who must decide between desire, ambition, and duty. In the summer of 1967, Leo Suther has one more year of high school to finish and a lot more to learn. He's in love with the beautiful Allie Donovan who introduces him to her father, Chick — a construction foreman and avowed Communist. Soon Leo finds himself in the midst of a consuming love affair and an intense testing of his political values. Chick's passionate views challenge Leo's perspective on the escalating Vietnam conflict and on just where he stands in relation to the new people in his life.

Throughout his — and the nation's — unforgettable summer of love, Leo is learning the language of the blues, which seem to speak to the mourning he feels for his dead mother, his occasionally distant father, and the youth which is fast giving way to manhood.

Reality Check Donald R. Prothero, 2013-08-01 A thought-provoking look at science denialism “for popular science readers who want better to be able to explain and defend science and scientific methods to others” (Library Journal). The battles over evolution, climate change, childhood vaccinations, and the causes of AIDS, alternative medicine, oil shortages, population growth, and the place of science in our country—all are reaching a fevered pitch. Many people and institutions have exerted enormous efforts to misrepresent or flatly deny demonstrable scientific reality to protect their nonscientific ideology, their

power, or their bottom line. To shed light on this darkness, Donald R. Prothero explains the scientific process and why society has come to rely on science not only to provide a better life but also to reach verifiable truths no other method can obtain. He describes how major scientific ideas that are accepted by the entire scientific community (evolution, anthropogenic global warming, vaccination, the HIV cause of AIDS, and others) have been attacked with totally unscientific arguments and methods. Prothero argues that science deniers pose a serious threat to society, as their attempts to subvert the truth have resulted in widespread scientific ignorance, increased risk of global catastrophes, and deaths due to the spread of diseases that could have been prevented. "Prothero's treatise will give the science-minded something to cheer about, a brief summary of the real data that supports so many critical aspects of modern life." —Publishers Weekly

Land of Wolves Craig Johnson, 2020-08-04 The new novel in Craig Johnson's beloved New York Times bestselling Longmire series. It's the scenery—and the big guy standing in front of the scenery—that keeps us coming back to Craig Johnson's lean and leathery mysteries. —The New York Times Book Review Recovering from his harrowing experiences in Mexico, Sheriff Walt Longmire returns to Absaroka County, Wyoming, to lick his wounds and try once again to maintain justice in a place with grudges that go back generations. As Walt searches for information about the shepherd, he comes across strange carvings on trees, as well as play money coupons from inside Mallo Cup candies, which he interprets as messages from his spiritual guide, Virgil White Buffalo. Longmire doesn't know how these little blue cards are appearing, but Virgil usually reaches out if a child is in danger. So when a young boy with ties to the Extepare clan arrives in town, the stakes grow even higher. Even more complicating, a renegade wolf has been haunting the Bighorn Mountains, and the townspeople are out for blood. With both a wolf and a killer on the loose, Longmire follows a twisting trail of evidence, leading to dark and shocking conclusions.
